ABOUT THE STATE

Boatmen along the lake front at Bur-
lington say that this year has been the
worst season for boat letting that they
have had for some years. June was the
best month of the season.

S. E. Darling of Hardwick has been
appointed to the position of private sec-
retary to collector C. H. Darling of Bur-
lington to succeed J. C. Jones, who will
enter the regular customs service.

Dan Stuart of Lake Dunmore and New
York and Mr. Nichols are incensed at
the report that they were severely in-
jured by the runaway of Mr. Stuart's
horses. Mr. Stuart says that he escaped
without any serious injury and that Mr.
Nichols was not injured at all.

A horse driven by George Miller and
owned by Walter Bronson of South
Shuttsbury became unmanageable while
being driven through Bennington Sat-
urday night. The infuriated horse ran
into several teams before it was cap-
tured.

A horse that will walk steadily five
miles an hour will cover the same
ground in a day with much less fa-
tigue than one that trots half the time.
We do not sufficiently appreciate the
value and capability of good, fast walk-
ers.

Land burned over almost always
comes up with an inferior growth
such as gray birch, wild cherry and
soft maple. Such land offers the most
hopeful chances for cheap improve-
ment through seeding or planting
pieces and putting the other trees in
a few years.

An odor will be observed in the milk
if silage is fed to cows a short time
before milking. But if given shortly
after milking the silage smell cannot
be detected.

It will mean a loss to the farmer to
have the cow afraid of him. It is a
loss every time she is frightened. To
run a cow to pasture is like throwing
money away. A cow in any way
winded will not do her best. The cow
that is made a pet of will make money
for its owner. The milk of a fright-
ened or abused cow is poisonous.

Pay an occasional friendly visit to
the little trees set this spring. Rub off
unnecessary sprouts and make sure
that no label wires have been left on
the trees to choke them.

Nearly every farmer has more or less
illage land that is too sour for best
crop production. He would try the ef-
fect of lime on an acre or two if he
knew that the specially prepared form
of lime can be spread easily on land
without any disagreeable effects on the
user or any troublesome preparation
of the material.

A good horse and wagon, neat clothes,
clean packages and polite manners nat-
urally go with a choice retail trade in
farm products.

George Elliott's Savonarola.

Savonarola is one of the most strik-
ing characters in George Elliott's great
historical novel "Romola," the scene of
which is in Florence and the period
that of Savonarola's career. The idea
of writing the book occurred to the
novelist while on a visit to Florence,
and on a second visit to the city, in
1891, she began to carry out her pro-
ject. The subject and design were for-
eign to the author's genius, but she
spared no pains in making a thorough
study of the locality, the people, and
the literature of the Italian renaissance
for the purposes of her story.

In her own words, the work "plowed
into her" more than any of her books.
She began it, she says, as a young wo-
man and finished it as an old woman.
Her picture of Florence and Savonarola
is undeniably impressive, and
some critics declare "Romola" to be
George Elliott's greatest novel and the
finest delineation of Savonarola.

Size of Heads.

The average adult head has a cir-
cumference of fully twenty-two inches.
The average adult hat is fully six and
three-quarters inches. The sizes of men's
hats are six and three-fourths and six
and seven-eighths generally. "Sevens"
hats are common in Aberdeen, and the
professors of our colleges generally
wear seven and one-eighth to eight
inches. Heads wearing hats of the sizes
six and three-eighths and smaller or
being less than twenty-one inches in
circumference can never be powerful.
Between nineteen and twenty inches
in circumference heads are invariably
very weak and, according to this au-
thority, "no lady should think of mar-
rying a man with a head less than
twenty inches in circumference." Peo-
ple with heads under nineteen inches
are mentally deficient and with heads
under eighteen inches invariably id-
iotic.—London Young Woman.

PRESCRIBES WORK

TO LIVE LONG TIME

Mrs. Emeline Knowlton Learned of St.

Johnsbury Center is a Living

Substantiation of Her

Claim.

St. Johnsbury Center, Sept. 15.—Mrs.

Emeline Knowlton Learned, for the past

71 years a resident of this village and

with one exception the oldest person in

town, observed to-day her ninety-second

birthday. No arrangements were made

for celebrating the event, and she will

not vary the routine of the day, taking

the occasion as philosophically as though

ninety-second birthday anniversaries

were every day occurrences.

Mrs. Learned was born in Dublin, N.

H., Sept. 15, 1817. Her father and moth-
er, Elisha and Hannah (Chamberlain)

Knowlton, belonged to families identified

with Dublin's earliest history, and long-
evity showed itself as a characteristic

of many of her ancestors, one of them,
Mrs. Hannah Barrett, dying at the age

of 98. She enjoyed the advantages of
Dublin's excellent school system.

At the age of 17 she married John Wil-

son Learned, also a descendant of one

of the town's pioneer families. After

their marriage Mr. Learned came to this

place to engage in carpenter work and

he later set up for his wife. It being be-
cause the days of the railroad in this

section, she made the trip from Dublin

in a pine sleigh, bringing with her the

18-month-old daughter. Two days were

consumed on the journey and the night

was passed at an inn where Mrs. Learned

informed a questioner that her destina-
tion was a place about 40 miles this side

of the Canadian line.

On her arrival here she was installed

in a two-room frame house on what is
known as Mount Pleasant, a house that

was occupied jointly by the Learned
family and Mr. Learned's partner and

wife. One room, the kitchen, also served
as a workroom and bedroom for the

men, while the women occupied the oth-
er. They soon moved into more com-
modious quarters in the village, and since

that time Mrs. Learned has always lived
here.

St. Johnsbury Center was at that time

the center of the town, and disputed
with Lyndon Center, another relic, the

industrial supremacy of northern Ver-
mont. The town hall was located here

and there were saw-mills, grist mills, a
tannery, and various other industries.

Many of the buildings now standing are
the centennials of the completion of Mr.

Learned's work. Among them are the
Methodist church and several dwellings

on Water street which escaped the de-
structive fire of 35 years ago. He also

built churches in Sheffield, Burke, and
Barre, and assisted in the work of mov-
ing the old town hall and meetinghouse.

The centennial of the completion of
which was celebrated Sept. 2, to its
present site.

Of ten children born to Mr. and Mrs.

Learned, five are now living. They are

Mrs. Elizabeth Putnam of Dorchester,
Mass., aged 73, James Learned, 69, Mrs.

Telen Hurd, 68, Sidney Learned, 65, Mrs.
Ida Brewer, 63, all of this place. Mr.

Learned died ten years ago, at the ad-
vanced age of 91.

Mrs. Learned is remarkably well pre-
served for one of her years. She wears

as well as she ever did and seldom wears
glasses. She has an excellent memory

and is an interesting conversationalist,
although somewhat forgetful. She is a

graduate of the College of France, and
has recently been studying at Harvard

university.

The work of Prof. William Stuart in

the department of horticulture will be
assumed by Marshall B. Cummings, U.

V. M. M. Prof. Cummings took a
master's degree from the university of
Maine in 1904 and has recently been do-
ing some special work in horticulture at
Cornell university, and has received his
doctor's degree from that institution. He

is also assistant horticulturist there.
J. P. Helyar, U. V. M. '09, will take a
position as assistant instructor in the
agricultural department.

Prof. Edward Robinson will return to
the university and resume the chair of
mechanical engineering. Prof. A. W.

Stocum of the department of physics has
gone abroad for the year, most of which
he will spend in study at Cambridge uni-
versity, England. His work will be car-
ried on by Professor Froese.

A large enrollment is expected this
year and there is every reason to believe
that the freshman class will exceed in
numbers those of the past two or three
years. The rooms in Converse hall are
already all taken. Commons hall is to
be opened under new management at
once. The early opening is for the accom-
modation of the football men.

The wood work of the "old mill" has
been treated to a new coat of paint and
several strips of asphalt walk have been
laid on the campus. The university
grounds and buildings are taking on a
smart and expectant appearance for the
coming year and the first few scattering
students are beginning to arrive in town.

THIRD VERMONT REUNION.

Was Held at St. Johnsbury Yesterday

With 46 Present.

St. Johnsbury, Sept. 15.—Forty-six

veterans attended the twenty-fourth an-
nual reunion of the Third Vermont leg-
ion at Grand Army hall yesterday.

Col. Thomas O. Seaver, of Woodstock,
presiding. At the business session these
officers were elected: President, Captain

Horace French, West Lebanon,
N. H.; vice-president, Charles H. Wood-
bury, St. Johnsbury; secretary and

treasurer, Col. Samuel E. Pingree, Hart-
ford. Five members of the regiment
have died during the year. The address
of the occasion was given by Capt.

French interspersed with singing by
Comrade A. J. Maxham, the well known
campaign singer.

A Hurry-up Call.

"Quick! Mr. Druggist, quick! A box

of Bucklen's Arnica Salve, here's a quar-
ter! For the love of Moses, hurry!"

Baby's burned himself terribly, Johnnie

cut his foot with the axe, Mamie's
scalded. Pa can't walk from piles, Billie
has boils, and my corns ache." She got

it and soon cured all the family. It's
the greatest healer on earth. Sold by
the Red Cross Pharmacy.

SCIENTIFIC FEEDING.

Health as a Primary Factor in Intelli-
gent Living.

Health and success are so largely
dependent upon balance, upon sym-
metry of development, physical and
mental harmony, that we should de-
everything possible to secure that
physical poise which also means men-
tal and moral poise. A large part of
our life comes from one sided develop-
ment, caused by overstimulating some
tissue cells and starving others—over-
feeding and underfeeding. Scientific
feeding, therefore, is of vast import-
ance.

Overeating and improper eating are
among the curses of the
